NEW BT-LH2550 25.5" LCD HD/SD Monitor

BT-LH1760 17" Wide LCD HD/SD Monitor

BT-LH80WU 7.9" Wide LCD HD/SD Monitor BT-LH900A 8.4" LCD HD/SD Monitor Panasonic's professional LCD video monitors feature compact, energy-efficient LCD panels with faithful color reproduction, fast image appearance, and a long list of functions to meet professional needs.

# BT-LH2550

Wide Color Space

This compact 25.5-inch monitor offers a wide color space and 1920 x 1200-pixel resolution. Ideal for use in post-production and in applications such as filmmaking, Computer Graphics, printing and research.

- A wider color space than CRT models, and new color space modes — Adobe gamma 1.8, Adobe gamma 2.2 and D-Cinema gamma 2.6.
  - gamma 2.6. shooting. Wide, 178° horizontal and vertical • Audio level r
- viewing angles.Built-in calibration function.
- New 2-input Split-Screen function.
- Three-dimensional LUT offering virtually the same color reproduction as CRTs in all video formats.
- Advanced image-enhancing circuitry, including excellent motion response and a diagonal line compensation circuit.
- Various marker, cross hatch overlay and blue-only display functions.
- Vector scope and waveform monitoring.
- Time code display with HD-SDI input.

- Closed caption display with VIDEO (NTSC) input.
- Cine-gamma (F-REC) compensation for Varicam shooting.
- Audio level meter overlay display with SDI input.
- New unit design with slim frame for space-saving installation.
- Two SDI (HD/SD), component and DVI-D inputs, RGB input compatible.
- RS-232C/GPI remote control terminals.
- Tally lamp (red, green).
- Headphone jack.
- Quiet operation without fan noise.
  Also operates on AC power
- (AC adaptor included).Wall mountable
  - (with optional BT-WMA26G).

BT-LH1760

Ideal for studio use, this model has double-speed drive and a new image processing engine for higher image quality. It also features a host of valuable functions that have been requested by our higher-end customers.

- Advanced image-enhancing circuitry, including excellent motion response and a diagonal line compensation circuit.
- Three-dimensional LUT offering virtually the same color reproduction as CRTs in all video formats.
- Double-speed drive displays moving images with minimal motion blurring.
- Wide, 176° horizontal and vertical viewing angle.
- Marker and blue-only functions.
- Vectorscope (SDI-In only) and waveform monitoring.
- Cross hatch overlay display.
- Pixel-to-pixel display without
- resizing HD pixels.Coordination of multiple cameras on split screens.
- Time code (HD-SDI only) and closed caption (NTSC) display.

- Cine-gamma (F-REC) compensation for Varicam shooting.
- Production-tough aluminum diecast frame build quality.
- Two SDI, component and DVI-D inputs, PC input compatible.
   RS-232C/GPI remote control
- terminals.
- Tally lamp (red, green)
- Headphone jack and built-in stereo speakers.
- Low power consumption and quiet operation without fan noise.
- Audio level meter overlay display (with SDI input).
- AC/DC power.
- Rack mounting (optional BT-MA1710G)
- Wall mounting
- (optional BT-WMA17G)
- LCD protective panel for outdoor use (optional BT-PRP17G)

With four screen sizes and five models to choose from, Panasonic monitors support broadcasting and image production tasks ranging from field recording with a camera-recorder to post-production and transmission.

# BT-LH1710

This versatile, rack-mountable 17" wide-screen LCD operates on AC/DC power and can be used in various applications both in the studio and in the field.

- Advanced image-enhancing circuitry, including excellent motion response and a diagonal line compensation circuit.
- Three-dimensional LUT offering virtually the same color reproduction as CRTs in all video formats.
- Wide, 176° horizontal and vertical viewing angle.
- Marker and blue-only functions.
  Vectorscope (SDI-In only) and
- waveform monitoring.
- Cross hatch overlay display.
- Pixel-to-pixel display without resizing HD pixels.
- Coordination of multiple cameras on split screens.
- Time code (HD-SDI only) and closed caption (NTSC) display.
- Cine-gamma (F-REC) compensation for Varicam shooting.

- Production-tough aluminum diecast frame build quality.
- Two SDI, component and DVI-D inputs, PC input compatible.
- RS-232C/GPI remote control terminals.
- Tally lamp (red, green)
- Headphone jack and built-in stereo speakers.
- Low power consumption and quiet operation without fan noise.
- Audio level meter overlay display (with SDI input).
- AC/DC power
  Rack mounting (optional BT-MA1710G)
- Wall mounting (optional BT-WMA17G)
- LCD protective panel for outdoor use (optional BT-PRP17G)

BT-LH900A

This small, lightweight, 8.4" unit features a high-resolution LCD panel and is ideal for monitoring recordings, installation in broadcast and production vehicles, and many more uses.

- Broadcast-quality color and gradation.
- Wide, 170° horizontal and vertical viewing angle.
- Marker and blue-only functions.
- Waveform monitoring.
- Cine-gamma (F-REC)
- compensation for Varicam shooting.Thin, small and light for
- Thin, small and light for on-camera mounting.
   Versetile detected centre
- Versatile detached control panel.Production-tough aluminum
- diecast frame.
- HD/SD multi-format compatibility with two SDI and component inputs.
- RS-232C/GPI remote control terminals.
- Tally lamp (red, green)
- DC operation (Anton Bauer/DC IN) and low power consumption.
- Side-by-side rack mounting (with optional BT-MA900G).

8.4"

- Tally lamp (red, green)
- DC operation (Anton Bauer/DC IN) and low power consumption.
- Side-by-side rack mounting (with optional adaptor).

# Five Advanced Technologies in the New BT-LH2550

Panasonic

### 1 A Wide Color Space with Six Color Space Modes

The color space of the BT-LH2550 is 102% that of the NTSC standard, so it exceeds the EBU/SMPTE range that can be displayed by ordinary LCDs. It accurately reproduces colors that are not easily reproduced by conventional displays, including CRTs, to meet the needs of both broadcasters and image production companies, and to work in fields such as digital cinema, CG production, printing, publishing, advertising, and research. The BT-LH2550 also offers three new color space modes in addition to the three conventional modes. The modes are menu switched. Modes can also be assigned to function switches on the front panel for quick and easy changing.

Color Space Comparison (Simulation): The top part shows the color space when set to the ITU-709 mode. The bottom part shows the color space in the WIDE3 (D-Cinema) mode. This screen image is simulated to show the differences in colors when using different modes.

### BT-LH2550 Color Space Modes

1.	SMPTE-C:	SMPTE-C standard
2.	EBU:	EBU standard
3.	ITU-709:	ITU-R BT.709 standard
4.	WIDE1:	Adobe color space, gamma of 2.2
5.	WIDE2:	Adobe color space, gamma of 1.8
6.	WIDE3:	D-Cinema color space, gamma of 2.6

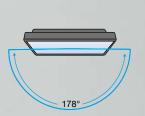

### A Space-Saving 25.5-inch Full-HD Monitor

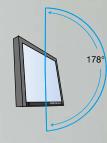

The BT-LH2550 is a full-HD WUXGA (1920 x 1200-pixel) highresolution IPS monitor. It is 10% narrower, 7% shorter, and has a 16% smaller footprint than our previous BT-LH2600W model with the

BT-LH2600W model with the same screen size.

### Faithful Color Reproduction Meets Broadcasting Needs [2550] [1760] [1710]

The BT-LH2550/BT-LH1760/ BT-LH1710 features a new image processing engine. By using a three-dimensional LUT (Look Up Table) for each RGB color and applying precise 10-bit image processing, it achieves faithful color reproduction from low to high brightness levels in all video formats.

\* SMPTE-C in North America.

### I/P Conversion Circuit for Motion Response

### [2550] [1760] [1710] [80WU]

[2550] [1760] [1710] [80WU]

Jagged noise on diagonal

lines in moving images is a

monitors solve this by

of moving images.

common problem. These LCD

detecting correlations in the

diagonal direction, resulting in

smooth, precise reproduction

A circuit delay time (not including panel delay) of approximately 5 msec<sup>\*1</sup> is achieved by incorporating an I/P converter circuit that converts SD and HD interlace signals with high precision and generates a progressive signal without causing field-length delay. Minimizing the delay between the input signal and monitor output enables the user to confirm footage without any incongruity.

### \*1: Differs slightly depending on the signal format.

# Diagonal Line Compensation

	TT			Γ					
				-					
	+++	+	-	-					
-	++	H							
+									

New Diagonal Interpolation

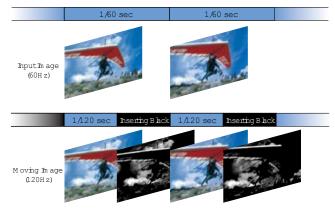

### Gamma Compensation for Each Monitor [2550] [1760] [1710]

In order to make the LCD monitor suitable for professional broadcasting applications, compensation is conducted for each monitor in 256 discrete RGB steps, rated gamma properties (g = 2.2) are reproduced, and gradation suitable for broadcasting is achieved. Color temperature of 9300K/6500K/5600K; 3000K to 9300K can be selected with the variable setting.

### Double-Speed Drive for Blur-Less Moving Images [1760]

Moving images without any afterimage are achieved by driving at a speed (120 Hz/100 Hz) that is twice the panel speed and inserting a black frame of a certain level between frames. Unlike frame creation methods, this system minimizes afterimages while displaying images faithful to the input signal. This high-performance, high-speed image display function is ideal for broadcast applications.

### High-Speed Response

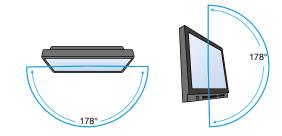

### [2550] [1760] [1710]

[2550] [1760] [1710] [900A]

The biggest concern when receiving a video feed is response time in the intermediate gradations. The BT-LH1760 uses double-speed drive to achieve superb response over the entire image, enabling the vivid image display without blurring. The BT-LH2550 and BT-LH1710 feature an overdrive circuit to improve response in intermediate gradations.

### Wide Viewing Angle

By using a high-intensity, high-contrast LCD panel, wide viewing angle is achieved in all models. The BT-LH2550 has a 178°, and the BT-LH1760/LH1710 has a 176° horizontal and vertical viewing angle. The BT-LH900A also has a 170° horizontal and vertical viewing angle. Easy viewing is ensured by reducing changes in color due to the viewing angle.

### HD/SD Multi-Format

### [2550] [1760] [1710] [900A] [80WU]

Compatible with most HD and SD formats, Panasonic LCD monitors are ideal for a wide range of applications in locations around the world.

# **Useful Display Functions for Professional Use**

the camera. You can also

### Pixel-to-Pixel Display

This function lets you display and confirm video pixels input in HD-SDI without any resizing. In the BT-LH1760/LH1710, this function is useful for image confirmation. When using 1080i, choose from five display areas:

center, right-top, right-bottom, left-top or left-bottom. In the BT-LH80WU, this function facilitates focusing. With 1080/60i input signals, you can check the focus with a screen width equivalent to 19 inches.

### Coordination of Multiple Cameras on Split Screens

### [2550] [1760] [1710]

[1760] [1710] [80WU]

A frame of video can easily be frozen and displayed as a still image on the left side of the screen. This function can be used to match a live camera with a frame of video shot at an

earlier time or with a different camera. There are two display modes: FULL for displaying and comparing the entire image on the screen, and PART for displaying and comparing only the center part of the images. (FULL-only on LH2550)

### Audio Level Meter Overlay

### **Time Code Display Function**

### **Closed Caption Function**

### Cine Gamma Compensation

compatibility as a monitor for the Varicam AJ-HDC27H Camcorder. This function supports the production of movies, film-like HDTV programs, and TV commercials.

### Focus-in-Red Function for HD Shooting

### [2550] [1760] [1710]

The BT-LH2550/LH1760/LH1710 come with an audio embedded function. In addition, the SDI-input audio level can be displayed on the screen with a white skeleton bar meter. Choose from 2-channel/4-channel/ 8-channel/OFF for the display.

### [2550] [1760] [1710]

With HD-SDI input, this function displays the value of the VITC, LTC or UB time code, depending on which one has been selected.

### [2550] [1760] [1710]

When an NTSC video signal is input, this function can display close captions (32 characters x 15 lines). The display mode can be selected from CC1, CC2, CC3 or CC4.

### [2550] [1760] [1710] [900A]

# Equipped with a cine-gamma (F-REC) compensation function for

[80WU]

focus the HD camera.

### Compact, Ergonomic Design [2550] [1760] [1710] [900A] [80WU]

The interface section and operation section are integrated into the compact body. Taking advantage of the slim size and light weight of the LCD panel, this integrated design enhances setup flexibility and simplifies operation.

### **Detachable Control Panel Adds Versatility** [900A]

The control panel is separated from the monitor, making the BT-LH900A suitable for a wide range of applications, including use as a monitor or viewfinder.

### Function Kevs [2550] [1760] [1710] [900A] [80WU]

Each of the function keys on the front panel can be assigned with a function selected from various display and switchover functions\* to enable one-touch display ON/OFF or mode change. These function buttons speed operation and customize the functions to the individual user's needs.

Functions Assignable to Function Keys (for the BT-LH1760\*) HV Delay/Autosetup/Blue Only/Gamma Select/ SD Aspect/Scan/Sub Window/WFM/Vector/Marker/ Pixel to Pixel/Pixel Position/Level Meter/Cross Hatch/Mono/ Time Code/Closed Caption/Undef

\* Assignable functions vary depending on the model.

### **Production Tough for Field Use** [1760] [1710] [900A] [80WU]

Panasonic BT-Series LCD monitors are built with an aluminum diecast frame. This superior build quality has been proven in the field to be production tough.

\* Front section only for the BT-LH1760/ LH1710.

### SDI and Component Input

### [2550] [1760] [1710] [900A] [80WU]

All five monitors allow for SDI with automatic switching between HD and SD. The BT-LH2550/LH1760/LH1710 are equipped with two SDI inputs and one SDI output. These models are also equipped with a component input (Y, PB, PR, RGB switching), Y/C, and composite. RGB is compatible with PC input. The BT-LH900A is equipped with two SDI inputs and one SDI output, one component input (Y, PB, PR or RGB switching), and one composite input. The BT-LH80WU is equipped with SDI (HD/SD) and Component (Y, PB, PR) input.

### **DVI-D Terminal (HDCP supported)**

### [2550] [1760] [1710]

The BT-LH1760 is equipped with a DVI-D input terminal for connection to a digital device with DVI-D output. It also supports HDCP, so a device with an HDMI terminal, such as a BD/DVD player, can be connected using a commercially available conversion cable or adapter.

\* DVI-A (analog) and DVI-DL (Dual Link) are not supported.

### External Remote Compatibility

### [2550] [1760] [1710] [900A] [80WU]

The standard RS-232C (9-pin) and GPI (9-pin) remote input terminals allow the monitor to be operated by an external device.

### Tally Lamps

### [2550] [1760] [1710] [900A] [80WU]

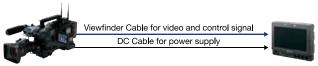

The front panel has red and green tally lamps. The BT-LH80WU also has a rear tally lamp for added convenience when using as a viewfinder.

### Viewfinder Connector

### [80WU]

Equipped with a 15-pin viewfinder terminal, the BT-LH80WU can also be used as a viewfinder\* for compatible Panasonic camerarecorders - AJ-HPX3700, AJ-HPX2700, AJ-HPX3000, AJ-HDX900, AJ-HDC27H, AJ-HPX2000 (US model), AJ-HPX2100 (European/ Asian model), AG-HPX500\* and AG-HPX502\* (Asian model). You can also run the BT-LH80WU on DC power supplied by these camera-recorders. Connection is easy, requiring only a viewfinder cable and DC power cable, supplied as the optional BT-CS80G.

\*Optional hardware is required for mounting to a camera-recorder.

AJ-HPX3700G/HPX2700G/HPX3000G/HPX2000/HPX2100/HDC27H/HDX900 BT-LH80WU

Stereo Speakers

### [1760] [1710]

BT-LH80WU

The built-in speakers on the right and left sides of the screen let you confirm stereo sound without having to connect external speakers.

### Headphone Jack

The BT-LH2550/LH1760/LH1710 are provided with a headphone jack.

### Low Consumption Current

The low-current-consuming LCD provides extra flexibility for use in an OB van or in the studio, and provides high cost-effectiveness. The consumption current of the BT-LH1760 operating on AC power is about 50% lower than our previous model.

### **Fanless Drive**

Fanless drive and its quiet operation make these models ideal for use in editing studios or MA rooms.

### Power Save Mode

When no signal is received for 60 continuous seconds, the Power Save Mode is activated to minimize power consumption.

### DC and Low Power Operation

### [900A] [80WU]

DC operation (Anton Bauer/DC IN) makes the BT-LH900A and BT-LH80WU ideal for use outdoors. Power consumption is very low, despite their HD/SD compatibility.

### Rack Mounting

### [1760] [1710] [900A] [80WU]

[2550] [1760] [1710]

[1760] [1710]

These four models can be mounted in a 19" rack. The BT-LH80WU and BT-LH900A allow side-by-side rack mounting when optional rack mounting hardware is used. The BT-LH1760 and BT-LH1710 use the optional BT-MA1710G adaptor for rack mounting.

### Wall Mounting

The optional wall mounting hardware (BT-WMA17G or BT-WMA26G, sold separately) allows wall mounting of these thin, lightweight LCD monitors.

### **Protective Panel**

The optional protective panel (BT-PRP17G) protects the LCD panel from environmental elements such as sand and dust in outdoor use.

# **Optional Accesories**

BT-WMA26G(Indoor use only) Wall Mount Adaptor for BT-LH2550

BT-WMA17G(Indoor use only) Wall Mount Adaptor for BT-LH1760/LH1710

BT-PRP17G **Protective Panel** for BT-LH1760/LH1710

BT-MA1710G **Rack Mount Adaptor** for BT-LH1760/BT-LH1710

BT-MA900G Rack Mount Adaptor for BT-LH900A

BT-YA80G SDI Input Unit (For BT-LH80W only. The BT-LH80WU is already equipped with the BT-YA80G.)

BT-CS80G VF Cable set for BT-LH80W/ LH80WU (Viewfinder Cable, DC Cable)
